

FINE TUNING YOUR PIANO

Ciao,

I was born in Crocetta del Montello, handmade and designed 100% Italian flair and style. I am the first boot that gives you more stability, power and movement, thanks to my **double antishock system** and revolutionary design. To get the best from me you need to follow these 3 fine tuning tips:

• TIP 1 CHECK THE SIZE

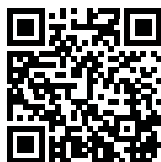

I'm designed to give you more support. I should feel tighter than your old boots. My heel lock means perfect position, your feet will feel snug, as I hold them in the right place. Try me on with your own orthotics or use the special **Impact Insole** supplied with me. No skating without insoles, you will hurt me, and eventually yourself !!

• TIP 2 CHECK THE LACING

I'm designed to give extra range of movement through correct lacing.

Correct lacing will give perfect performance. **Check the video:** and use the **lace puller** to get the perfect tension.

• TIP 3 LACING AGAIN

Lacing is so important to me, I need to talk about it twice. Laces will lose elasticity so we've included an **extra pair**. You will also see some **Lace Straps** which will help keep laces in place and tidies them away.:

* INCLUDED IN THE KIT

LACE ME CORRECTLY AND WE WILL WORK PERFECTLY TOGETHER!
